VEGETABLE
SEED TRALS
WORTHINGTON

To Our Friends and Customers

IN ALL COMMERCIAL ACTIVITIES a reputation for trustworthiness is the most valuable of assets, but for the seedsman it is absolutely indispensable.

Your success, in great measure, depends upon the quality of the seeds you plant and your complete satisfaction is of the greatest importance to us.

For over 30 years we have been dealing with the critical commercial vegetable growers, who are planting and raising vegetables, with the expectation of making a profit.

We make every effort to faithfully supply the best seeds obtainable as to quality and vitality. Your order commands intelligent handling, the knowledge from long experience, and efficient service.

IMPORTANT INFORMATION

HOW TO ORDER

Please sign your name, post office, county and state on every letter sent to us. You may remit at our risk by Post Office Money Order, Check, Draft, Express Order,

Cash, Stamps or by Registered Letter. We guarantee safe and prompt delivery whether sent by mail, express or freight.

HOW SEEDS ARE SHIPPED

Prices quoted in this List include transportation charges except on potatoes, field seeds, feed, berry boxes, baskets, plants, insecticides, fertilizers and implements, which will be shipped at buyer's expense.

In ordering please mention whether wanted by mail, express or freight.

Berry Boxes and Fruit Baskets at Market Prices.

TERMS

Cash with all orders. We make no charge for boxes, bags, packing or drayage.

All prices quoted in this list are subject to market fluctuations or prior sale.

Discounts—On orders of vegetable seeds listed in this Price List we offer the following discount for cash:

\$10.00 and over—5 per cent.

We guarantee safe and prompt delivery on every order.

GUARANTEE

We buy and sell **THE BEST SEEDS THAT GROW**. But it is impractical to guarantee seeds, as the best seeds will fail under improper treatment. Some may be sown in too dry ground or too wet, too deep or too shallow. Some hardy seeds stand cold weather and will grow where the soil is too cold for others and would cause them to decay. Insects may attack and destroy them. For these reasons we give no warranty, express or implied, as to description, quality, or any other matter of any seeds, bulbs or plants we send out and we will not be in any way responsible for the crops. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Without good seeds it is impossible to produce good crops. Our aim is to supply only the highest possible quality produced. You cannot buy better seeds no matter what you pay.

Field seed prices are all subject to change without notice. Write for samples and special prices on your field seed requirements. We will save you money.

BEET

OUR NEW MATCHLESS BEET

OUR NEW MATCHLESS BEET is a fine globe shape variety for early bunching, as well as for main crop. There is no beet that is its equal in quality and fine appearance. In fact, it is perfect in every way. It is as early as the finest strains of beets known to us in our long experience of thirty years' dealing with the critical market gardeners. It is superior in shape and color with the

extra advantage that its foliage is lighter green in color. The bulbs have small tap root, are smooth and much darker in color than most globe beets, both in and out. The flesh is rich, deep brilliant scarlet red without light zones, always sweet and tender. Matchless is an all-purpose beet, but especially fine to growers catering to trade who demand quality and appearance.

CAULIFLOWER

WHITE MOUNTAIN is a somewhat more vigorous type of the Snowball class and selected to produce a larger head than Snowball without losing materially in earliness. After we introduced this new type, result of close co-operation between our breeding department and a prominent market gardener, it has conquered the market by leaps and bounds and we feel perfectly sure it will meet with instantaneous favor in your locality. This new strain will mature with great evenness and, although Snowball will perhaps give a few forerunners a couple of days before White Mountain makes its start, the bulk

of the crop is nearly as early and harvesting may be completed 120 days after date of sowing. The pure white heads are remarkable for their great depth and unexcelled white color. The curd is of fine texture, and resistant in a high measure to "richness" and "fuzziness." Also heads in which small green leaves appear will be sought in vain. The foliage is somewhat larger than of Snowball and the inner-leaves are perfect, protecting the head until nearly full grown. We are sincere in believing that White Mountain ranks as one of the very superior stocks of Cauliflower available anywhere at any price.

CHINESE CABBAGE (Chihli) — Earliest and most sure heading of the Chinese varieties. Upright growth, long, solid, white cylindri-

cal heads, two feet in length. Leaves broad, smooth, fringed on edge; superior quality. Sow seed about July 25.

MUSKMELON

HALE'S BEST SPECIAL—Days to maturity, 70-72. Hale's Best, sometimes spoken of as Early Imperial, because it will give you a ten-day

leeway over your neighboring competition, will no doubt be your most profitable Cantaloupe. It is ten days earlier than other Rocky

Ford types, and brings the high prices. If you are a grower and shipper of Cantaloupes, we can give you no better advice than to plant Hale's Best on a large acreage this year. The Imperial Valley Cantaloupe growers, the keenest group of men in the industry, have been growing an increasingly large acreage of it for the past four years.

Last season saw approximately 20,000 acres planted to Hale's Best in California, with a very decided falling off in its favor of the well-known 10-25, the Cantaloupe that made the Imperial Valley famous. Our stock of Hale's Best has been grown privately for us in Colorado, and has been found to be of first quality in every respect.

RADISH

RESELECTED SCARLET GLOBE, Standard Type, No. 1—Grown from carefully selected transplanted roots. A perfect strain, result of individual plant selection. Surprisingly uniform, color brightest scar-

let, shape perfect, well-rounded bottom, with thin tap-root. Tops are of medium size and uniform. Flesh pure white, crisp and of fine flavor. It remains very long in prime condition. Fine for market.

SCARLET GLOBE, No. 2, SPECIAL OUTDOOR STRAIN (with more top) (Transplanted Stock)—The past few years we have had an increasing demand, especially from growers of the Norfolk, Va., section, for a Scarlet Globe Radish which will produce somewhat larger tops than our regular Reselected Scarlet Globe. It sometimes occurs that the tops of the latter variety

when sown outside remain too short so that they do not bunch well. This demand has prompted us to select a strain with somewhat larger tops and we are glad to be able to offer it to the trade now. This radish differs from our Reselected strain only in the length of tops, as for the rest it is quite as perfect in every respect. It is unsurpassed for outdoors truckers' work.

TOMATO

VICTORY SPECIAL—Victory is the last word in Tomatoes and is rightfully named. It is a victory for tomato growers. The last three years has convinced us that **VICTORY SPECIAL** is a Tomato all market gardeners should plant where their market demands a good

large, firm, scarlet Tomato. **VICTORY SPECIAL** is just that and we cannot recommend it too highly. The vine of **VICTORY SPECIAL** is short stemmed, unusually healthy and astonishingly productive. The shape of the fruit is of full globe shape and quite free from cracks.

Golden Sunshine Sweet Corn

An Early Golden Bantam

Sunshine is ready for market a week to ten days before Golden Bantam. In fact, will be off the market before that variety is ready. The plant growth is dwarf and the

ears closer to the ground. The ears are the same size as Bantam but 12-rowed instead of 8, of equally good color and with a high quality grain.

CUCUMBER

Our Wonderful

OUR WONDERFUL—Beautiful in appearance, of dark bluish green color. Suitable for both the garden and forcing. A healthy, productive and fairly early variety, the fruits averaging 14 inches in length by 2½ inches in diameter and are very symmetrical. An ideal Cucumber for the market grower and greenhouse man as a “straight

pack” variety for shipment boxed and wrapped in paper, to markets, demanding top notch products where price is no object. The seed we offer is of the highest quality saved only from well developed straight and perfect fruits. Whether you wish to grow it in the open or under glass, rest assured that our seeds are the best money can buy.

Bloomsdale or Blue Scotch

KALE or BORECOLE

BLUE SCOTCH—Similar to Dwarf Green Curled Scotch except that it is of a bluish green color instead of a bright green, and is of dwarfer habit. The stem is so short that it

rests directly on the ground, which protects it from cold. It is hardier than Green Curled Scotch and will pass through the winter unharmed as far north as Connecticut.

California Wonder Pepper (actual size)

PEPPER

THE CALIFORNIA WONDER PEPPER combines the fine quality of the Pimiento and the size of the Ruby Giant with a thickness of flesh unknown in any other variety. The fruits are blocky or square-shaped, slightly broader at stem

end than at nose, without distinct indentations, and free from roughness at blossom end. The average full grown California Wonder Pepper has a breadth of 4 inches and is 4½ inches in length, many specimens weighing a full pound.

Bright Scarlet Globe. Special Greenhouse Stock

RADISH

BRIGHT SCARLET GLOBE, SPECIAL GREENHOUSE STOCK (Transplanted Stock)—We have offered a Special Greenhouse Stock of Scarlet Globe Radish a few years ago which has made many friends. Last year we offered an improved stock of this type. In addition to an earlier maturity, this strain is

much improved in color, which is a rich brilliant scarlet, approaching the Saxa color. Its main advantage is the unsurpassed quality. Crisp as no other radish, thin-skinned and much longer standing before becoming pithy. This improved strain is one of our new introductions of "Quality Radishes."

*The Simplest, Most Effective and
Easiest to Operate DUSTER
on the Market*

No. 200 D and B Duster

Hopper holds about 7 lbs. of spraying powder.

Price \$12.00

THE No. 200 D&B DUSTER is best suited for low-growing crops such as Potatoes, Tomatoes, Cabbage, Berries, Melons, Tobacco, Cotton, etc. It can also be used effectively on shrubs and small trees. Hopper holds about 7 lbs. of spraying powder.

SIMPLE AND EASY TO OPERATE—Without doubt this is the most simple and easy operating duster of its kind on the market. Light in weight, well balanced and supported over shoulder by heavy web strap. Made of very few parts and there is nothing to get out of order. Dial indicator with graduating figures makes possible quick and accurate adjustment for regulating flow of powder from hopper. It is possible for operator to set the

indicator for any definite amount of dust desired. This eliminates guess work in controlling density of the dust cloud. Distributes the dust uniformly. The powerful air blast produced by the fan breaks up the powder into a fine dust cloud, instantly covering all parts of the plant. The agitator and feeding mechanism are made strong enough to break up all hard lumps of powder without injury to any parts of the Duster. Comes complete with attachments for dusting one or two rows. Elbows, pipes and wide spreading nozzles can be adjusted to direct dust cloud in many directions. **Price \$12.00.**

No. 100—Construction and operation same as No. 200 described above. **Price \$9.00.**

RUBBER BANDS

New Rubber Bands (gray in 1-lb. boxes) cheaper and far more handy than twine for asparagus, onions, radishes and other bunching varieties. The number 8 count about

7,000 to pound, the larger sizes a trifle less count per pound. We can supply the following sizes: Nos. 8, 9, 10, 11, 12, 14 and 16. Price 65 per lb. Prepaid.
